

KARAN PRABHAT

Aspiring AI/ML Engineer | Data Science | Full-Stack Developer

Kolkata, India | +91-7667358947 | prabhatkaran47@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Summary

Aspiring AI/ML engineer with strong foundations in machine learning, deep learning, and full-stack development. Proven ability to build end-to-end data science pipelines and deploy production-ready applications with measurable impact. Passionate about solving real-world problems through intelligent systems and targeting high-impact engineering roles at top-tier tech companies.

Education

- B.Tech — Computer Science & Engineering (AI & ML)** Aug 2023 – Aug 2027
Sister Nivedita University, Kolkata, West Bengal
- I.Sc — Intermediate of Science (Mathematics)** Apr 2020 – Apr 2022
Marwari College Ranchi, Jharkhand

Technical Skills

Programming Languages: Python, C, C++, JavaScript

AI/ML & Deep Learning: Machine Learning, ANN, Deep Learning, TensorFlow, Keras, Scikit-learn, SMOTE, imbalanced-learn

Data Science: Pandas, NumPy, Matplotlib, Seaborn, Feature Engineering, EDA, Jupyter Notebook, Colab

Web Development: HTML, CSS, React, Streamlit, Frontend, Backend Basics, REST APIs

Tools & Platforms: Git, GitHub, VS Code, Figma, Streamlit Cloud

Core CS Subjects: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks

Projects

IoT Network Security Analysis & ML-Based Attack Detection *Python, Pandas, NumPy, Scikit-learn, Matplotlib*

- Processed 211,043 IoT network flow records, engineered 51 features, and built a complete preprocessing pipeline on 190,474 clean records.
- Benchmarked Logistic Regression, Decision Tree, and Random Forest; **Random Forest achieved 99.82% accuracy, F1 = 0.9988, Recall = 0.9990.**
- Identified key attack patterns through EDA, including TCP-dominant attacks, Port 4444 backdoor activity, and S0 as a strong port-scan indicator.

FraudNet AI — Credit Card Fraud Detection *Python, TensorFlow/Keras, Scikit-learn, imbalanced-learn*

- Built an MLP on 284,807 transactions; applied SMOTE on training data to address severe class imbalance without data leakage.
- Achieved **AUC-ROC of 0.97–0.99** and **Recall of 0.85–0.93**; improved generalization using Dropout and Early Stopping.

Canteen Menu Optimizer *Python, Scikit-learn, Streamlit | Deployed on Streamlit Cloud*

- Developed and deployed a dietary preference prediction system with **82.6% accuracy**, enabling an estimated **56.4% ROI improvement** and **~30% reduction in food waste.**

Experience & Training

Generative AI Annotator — Remote Internship Jan 2026 – Apr 2026
RT Networks Pvt. Ltd.

- Annotated and validated AI-generated content to improve model accuracy, consistency, and quality.
- Evaluated responses for correctness, relevance, and safety while adhering to structured annotation guidelines.

InnovateBank Digital Transformation — Product Design & Implementation Nov 2025 – Jan 2026
XPMC XPro Program | Employability.life & Federation University Australia

- Redesigned a digital loan journey using the Double Diamond framework, user research, Figma wireframes, and customer communication workflows.
- Contributed to agile sprint execution by defining implementation roadmaps, KPIs, and feature prioritization.

Full-Stack Web Developer — Training Program May 2024 – Aug 2024
Pantech Solutions, Chennai (Online)

- Built full-stack web application clones, strengthening frontend-backend integration, debugging, and software development practices.

Achievements & Certifications

- Smart India Hackathon (Internal Round):** Ranked in top 35% among 120 teams (600+ participants) with an AI-based Traffic Management System project.
- XPMC XPro Certification** — Employability.life & Federation University Australia (2026): Product Thinking, UX Design, Roadmapping, and Agile Collaboration.

Certifications: Introduction to Generative AI — Google Cloud | Introduction to Artificial Intelligence (AI) — Coursera | Design Thinking for Innovation — Coursera | Internship in Full-Stack Web Development — Pantech Solutions | Generative AI Annotator
